Skills

♦ JAVA 5.0/7.0/8.0	♦ JSF1.2/2.0	♦ Hibernate 3
♦ JSP,SERVLETS,TILES	♦ Struts 2.3/2.5.22	♦ IBM WEBSPHERE/WEBLOGIC9. 2/BEA WORKSHOP 9.2/WEBLOGIC12C
♦ HTML/XML	♦ Javascript	♦ TOMCAT 5.0/WEBLOGIC 9.2
♦ CORE JAVA	♦ JMS	♦ Windows 2012, 2016
♦ MYSQL	♦ ORACLEV9.2 / ORACLE12C	♦ UNIX

Education

B.TECH (Bachelor of Technology) Institute of Technical Education and Research – 2012

Current Company

Tata Consultancy Services – June 2012 - Present

Project Experience

Application - CAPS (Claims Automated Processing System)
Designation: Associate Consultant
Client : ICICI Prudential Life Insurance(Insurance Claims)

Role: Developer, Team Lead
(Team Size: 12)
Nov 2013 till date

CAPS application is an unique standalone front end tool for claims processing. Based on the input details , system gets invoked to give the decision. On case to case basis , the decisions get changed and it has connectivity with various other applications from/through which the details gets fetched/pushed.

Integration with the application -

LA (Life Asia): Integrated using the Bo (Business Object) for claim registration and fetching the data

SMS , Letters for communication - Integration through Data source mapping in server

Mail - Integration with mail server for sending PDFs on mail.

Application - RECONCILIATION

Designation: Associate Consultant

Client : ICICI Prudential Life Insurance(Insurance Claims)

Role: Team Lead (Team Size: 8)

Nov 2018 till date

RECON application

Recon (Application) is used to tally the Bank Payment Transaction (Electronic/ Cheque /Cash / Alternet, etc), and ledger transaction excels received from the Life Asia (IPRU repository). When we upload Bank Transaction excel and Ledger excel in the Recon, if the Payment amount and Ledger amount match for the particular customer policy then particular transaction will be closed (transaction completed), if the Bank Payment amount and customer policy amount doesnt match then the status will be in open. There are many rules written in the form of procedures in the backend to close the status

Application - E-Cashless

Designation: Associate Consultant

Client : ICICI Prudential Life Insurance(Insurance Claims)

Role: Developer, Team Lead

(Team Size: 5)

Nov 2016 till date

E-CASHLESS application is used to register cashless claims at hospital's end. The application has been handed over to the hospitals for claims settlement if there is an immediate hospitalization. Based on the Insurance card , company ID and Insurance coverage / eligibility, a hospital can initiate cashless process based on the illness . Once claim is registered in the portal, assessor has to give decision within 3 hours. Communication is also triggered between hospital, customer and insurance company. Every hospital tied up with insurance have been given access to perform cashless claims settlement.

Activities included: -

- a) Responsible for requirements gathering, impact analysis and documenting the functional specifications.
- b) Coordination as an onsite counterpart and Client Interaction.

- c) Responsible for the design and development of the application framework.
- d) Responsible for application testing, Troubleshooting, Bug fixing and Customer Support.
- e) Responsible in Migrating Database server, Application server and windows server for 3 applications
- f) Responsible for implementing maximum process improvements by a vendor
- g) Responsible in process audits and resolution
- h) Responsible for driving 3 different applications at the same time consisting of 25 resources
- i) Grooming resources and thrive for results.
- j) Responsible for managing client driven change management tools like icm, arcoss, SASPortal, etc
- k) Responsible for analyzing support tickets month wise and planning for mitigation.
- l) Responsible for code review activities (Normal and Security Perspective)
- m) Preparing weekly, monthly , governance reports and other reporting activities
- n) Responsible in performing Disaster Recovery Drill for 3 applications.
